PROFILE

Full-stack SWE with ~5 years of experience across payment products, APIs, UIs, web apps, platform services, and engineering tools. Currently working in the Bitcoin and Lightning Network ecosystem.

EXPERIENCE

Amboss

Software Engineer

Nov 2024 - Present

United States / Remote

- Built L402/LSAT paid API access, OAuth 2.0/TOTP identity, GraphQL/REST APIs, and React/Next.js surfaces.
- Worked on Taproot Assets, Lightning liquidity, LND integrations, AWS/Kubernetes delivery, and internal tooling.

Coinswap

Software Engineer / Maintainer

Nov 2023 - Oct 2024

United States / Remote

- Reduced wallet storage 28.8% with binary CBOR encoding.
- Cut integration-test latency 21.7% through protocol encoding optimizations.
- Owned Rust API docs and cleanup across wallet/protocol modules.

Summer of Bitcoin

Selected Fellow / Open Source SWE

May 2024 - Sep 2024

United States / Remote

- Built wallet infrastructure from scratch using BDK chain interfaces.
- Reimplemented WalletStore, Wallet, public APIs, and modular storage.
- Added protocol keychains and RPC synchronization support.

Google Summer of Code

Selected Fellow / Open Source SWE

May 2023 - Sep 2023

France / Remote

- Integrated backlinks, titles, URLs, and document references through XWiki APIs.
- Added search, facets, filters, and theme-aware graph interactions.
- Shipped docs, a project blog post, and a YouTube demo.

Freelance

Freelance Software Engineer

Dec 2021 - Apr 2023

India / Remote

- Delivered freelance work through Upwork, Fiverr, Freelancer, iWriting, GreatWall, and hackathon projects.
- Built small web products, APIs, frontend surfaces, and automation workflows.
- Accumulated 2000+ merged pull requests across open-source and private work.

TECHNICAL SKILLS

Languages

TypeScript, Rust, Go, Python, JavaScript, C/C++, Solidity, Shell

Backend

Node.js, NestJS, gRPC, REST, GraphQL, PostgreSQL, Redis, OAuth 2.0, JWT

Frontend

React, Next.js, Astro.js, D3.js, Graphology, SigmaJS

DevOps

AWS, Docker, Kubernetes, CI/CD, Datadog, GitHub Actions

Blockchain

Bitcoin, Lightning Network, Taproot Assets, Payments, Wallets, Protocol testing

AI

MCP, RAG, LLM APIs, Claude Code, Codex

Styling

Tailwind CSS, Design systems

ACHIEVEMENTS

Summer of Bitcoin: selected from 5000+ applicants.

Linux Foundation Mentorship: selected from 10,000+ applicants.

Google Summer of Code: selected fellow from the top 2% of 43,765 applicants; shipped a 350-hour project.

Major League Hacking: selected for the software engineering track.

CodeChef Long Challenge II: Global Rank 1.

SELECTED PROJECTS

unixdm

C++17 terminal download manager with segmented downloads, resumable state, batch queues, and an interactive TUI.

C++17, CMake, POSIX, FTXUI

autocommit-rs

Published Rust CLI for generating conventional commit messages from staged Git changes.

Rust, Git, OpenAI, Gemini

EvalPro

Full-stack AI evaluation platform for dataset ingestion, model scoring, and human adjudication workflows.

Next.js, TypeScript, FastAPI, PostgreSQL

EDUCATION

Panjab University — Bachelor of Engineering

2025 / 7.25/10
